### Dear Colleagues,

It is our great pleasure to invite you to the 8<sup>th</sup> edition of the Postgraduate Course in IBD. We look forward to meeting you in person in Ermatingen, after a long period of arranging digital events due to the epidemiological situation.

The IBD Postgraduate Course provides an ideal platform to discuss the most recent developments in the field of IBD and future trends. The three-day workshop starts with a hands-on training on «Intestinal Sonography», followed by therapy updates and state-of-the art lectures on Friday as well as interactive workshops on Saturday.

Many internationally renowned speakers and local IBD experts will share both their experience and knowledge, which has a high impact for your daily clinical practice. Thanks to the interactive course format you will have the opportunity to share best-practices in difficult patient settings.

We are looking forward to spending three interesting and instructive days with you!

Yours sincerely
